

Kuna Chair

Warmth and Modern Design

Kuna Chair Collection

The Kuna chair seamlessly combines the tradition and warmth of saddle leather with a clean, modern aluminum line. Crafted exclusively from top-quality leathers, the Kuna chair emphasizes the material richness of leather, bringing it to the forefront of its design. With a wide range of color variants available, the chair's linear aluminum structure further accentuates the essentiality and purity of its lines, making it a versatile addition to any workspace, executive office or meeting room.

Experience unparalleled comfort with our premium saddle leather seat and backrest, meticulously wrapped around a robust supporting structure. Enhanced with variable-density polyurethane foam, the seating surface adapts to your body for optimal cushioning. The ergonomically engineered seat shell ensures even distribution of body weight, providing sustained comfort during prolonged use. The visible load-bearing elements are crafted from die-cast aluminum, available in elegant polished or sleek chromed finishes to complement any interior décor.

The collection is available with three distinct backrest heights, designed to cater to various comfort preferences and support needs. Whether you prefer a low, medium, or high backrest, our options ensure the perfect fit for every user. Armrests are available with optional saddle leather coverings for added comfort and aesthetic appeal. For those who prefer a more minimalist design or need to save space, armrests can be omitted without compromising the chair's integrity.

Kuna Chair | Technical Specification

Structure: Frame made of tubular steel for a rigid structure able to maintain its shape even under conditions of considerable stress. Visible load-bearing elements made of die-cast aluminum with polished or chromed finish. Available in three backrest heights.

Seat and backrest: The saddle leather sheet covers the supporting structure padded with a series of variable density polyurethane foam. The sheet thus obtained fit to perfectly distribute the weight of the body.

Armrests: Closed shape, made of die-cast aluminum with finish depending on the structure. Optional saddle leather armrest covers. Available also without armrests.

Swivel auto-return mechanism: This special mechanism, not adjustable in height, allows the swivel chair to freely rotate and automatically returns it to its original position to keep the position of the meeting chairs always aligned. It is standard on the 4-star base models.

Height adjustment: Seat height can be adjusted a maximum of 12 cm with a lever. The gaslift complies to EN16955:2017.

Tilt mechanism: An intuitive and effective tilt mechanism that instantly follows the user's movements. The particularly forward rotation point reduces pressure on the lower limbs while the chair rocks. The movement of the seat allows up to 13 ° of oscillation. The side knob allows to adapt the resistance of the tilting mechanism to the weight and sitting style of the user. Lever controls integrate the seat height adjustment, allow to lock/unlock the tilting mechanism in 4 positions and activate the backrest safety release.

Base: Four or five star base made of die-cast aluminum, with a polished or chromed finish depending on the structure. Available with castors or plastic glides.

Castors: In black plastic with soft running surface for use on any type of flooring and a load depending safety brake complies to EN 12529:2001. Castor cover in chromed Zamak, diam. 50 mm.

Glides: In black nylon base and soft-plastic glide, diam. 37 mm.

Sustainability

Our design and production philosophy is based on the pursuit of simplicity in order to create sustainable and durable collections. Our products have an unmistakable design which however is subjected to the carefull evaluation of any possible aspects to improve sustainability, durability and recyclability in accordance with the highest international standards. We believe that our responsible approach may effectively reduce environmental impact of our products throughout the entire lifecycle of the various components. We do not use chemicals hazardous or dangerous to the environment, and the materials we use are tested and evaluated for potentially harmful effects on human health and the environment. Where possible, we reduce packaging materials to a minimum, which also optimises transport volume.

Kuna Chair

Materials		%
Aluminum		48
Metal		28
Miscellaneous		24
Total		12.4 kg

The materials we select meet high quality standards, guaranteeing durable and eco-friendly products.

At ICF, we use:

- Ecological and/or post-consumer recycled materials;
- Products free from formaldehyde and toxic substances;
- Finishes free from hexavalent chromium.

Each component of the seat can be disassembled for repair, reuse and recycling.

		%
Recycling		77
Not recycling		23

Kuna Chair is a chair weighing approximately 12.4 kg and approximately 77% recyclable when completely and correctly separated.

Kuna Chair is conceived in accordance with the guidelines of eco-design, a technical methodology applied during design of a product in order to reduce that product's carbon footprint and environmental impact.

Note:
Material and Recycling content percentages may vary depending on the specific model evaluated and consequently of the structural materials and finishes of the considered model.
The above sustainability contents refer to model KUNA.708.
