Una Executive Collection

The Una Chair collection of office chairs is completed with Una Executive, a padded high-profile chair which adds new options to an already highly successful solution. Una Executive joins functionality to design in the definition of an object which is at the same time elegant and modern, simple and efficient. Una Executive is a chair collection designed to support executive and meeting business in a dynamic and flexible way offering a wide choice of personalization.

Great attention has been paid to every detail, starting from the upholstered pads to the characteristic perimetral seams, from the die-cast aluminum frame to the mechanical devices that improve comfort when seated even for a significant number of hours.

The collection is designed for executive office, meeting rooms or boardroom and is available in a low back and a high back version, optionally with a swivel auto return mechanism and a forward tilting mechanism. The upholstery is available in leather or fabric. Height adjustment with pneumatic gas lift. Four-star base on glides or five-star base on castors, made of die-cast aluminum.

Chromed structure and upholstery in fabric, different bases and mechanism.

Painted structure and upholstery in fabric, different bases and mechanism.

Technical Specification

Structure: Die-cast aluminum side elements and crosspieces elements fastened together. The resulting frame is a rigid structure able to maintain its shape even under conditions of considerable stress and also functions as a specific support for the padding. Available with low or high back and in three different finishes: polished, chromed or painted.

Seat and backrest: The special padding, made of a series of cushions combined with a load-bearing sheet stretched between the two side elements, guarantees maximum comfort and durability. The shaped cushions with differentiated densities are made of polyurethane foam and upholstered in fabric or leather. The leather covering includes an eco-leather back with predetermined color combinations.

Armrests: Closed shape, made of die-cast aluminum with finish depending on the structure. Optional leather armrest covers. Available also without armrests.

Swivel auto-return mechanism: This special mechanism, not adjustable in height, allows the swivel chair to freely rotate and automatically returns it to its original position to keep the position of the meeting chairs always aligned. It is standard on the 4-star base models.

Height adjustment: Seat height can be adjusted a maximum of 12 cm with a lever. The gaslift complies to EN16955:2017.

Tilt mechanism: An intuitive and effective tilt mechanism that instantly follows the user's movements. The particularly forward rotation point reduces pressure on the lower limbs while the chair rocks. The movement of the seat allows up to 13 ° of oscillation. The side knob allows to adapt the resistance of the tilting mechanism to the weight and sitting style of the user. Lever controls integrate the seat height adjustment, allow to lock/unlock the tilting mechanism in 4 positions and activate the backrest safety release.

Base: Four or five star base made of die-cast aluminum, with a polished, chromed or painted finish depending on the structure. Available with castors or plastic glides.

Castors: In black plastic with soft running surface for use on any type of flooring and a load depending safety brake complies to EN 12529:2001. Castor cover in chromed Zamak or black plastic, depending on the base finish, diam. 50 mm.

Glides: In black nylon base and soft-plastic glide, diam. 37 mm.

Materials Certifications

We use fabrics that guarantee high performance in terms of comfort, strength and sustainability. Attention to the health and safety of people and the environment are verified through globally-recognised product certification. Most of the upholstery we use for our seating collections is made from recycled materials which can also be reused at the end of their service life.

Sustainability

Our design and production philosophy is based on the pursuit of simplicity in order to create sustainable and durable collections. Our products have an unmistakable design which however is subjected to the carefull evaluation of any possible aspects to improve sustainability, durability and recyclability in accordance with the highest international standards. We believe that our responsible approach may effectively reduce environmental impact of our products throughout the entire lifecycle of the various components. We do not use chemicals hazardous or dangerous to the environment, and the materials we use are tested and evaluated for potentially harmful effects on human health and the environment. Where possible, we reduce packaging materials to a minimum, which also optimises transport volume.

Una Executive

Materials		%
Aluminum		56
Plastic		21
Polyurethane		13
Metal		4
Miscellaneous		6
Total		14.4 kg

The materials we select meet high quality standards, guaranteeing durable and eco-friendly products.

At ICF, we use:

- Ecological and/or post-consumer recycled materials;
- Products free from formaldehyde and toxic substances;
- Finishes free from hexavalent chromium.

Each component of the seat can be disassembled for repair, reuse and recycling.

		%
Recycling		94
Not recycling		6

Una Executive is a chair weighing approximately 14.4 kg and approximately 94% recyclable when completely and correctly separated.

Una Executive is conceived in accordance with the guidelines of eco-design, a technical methodology applied during design of a product in order to reduce that product’s carbon footprint and environmental impact.

*Note:
Material and Recycling content percentages may vary depending on the specific model evaluated and consequently of the structural materials and finishes of the considered model.*

The above sustainability contents refer to model UNA.918.
