

GRID Table Collection

Press release — January, 2025

+Halle®

GRID Table Collection, designed by London-based studio Industrial Facility, is the first product in the new Basics range from Danish manufacturer +Halle®.

Industrial Facility and +Halle® have spent the last two years perfecting GRID, an affordable range of everyday, anywhere tables. Effective as worktops, dining tables, side tables, or desks, GRID tables are easily assembled, lifted, reconfigured and packaged.

GRID's sturdy steel legs are combined with a choice of tops, showcased with Kvadrat's 'Really' top, an affordable, recycled and circular option made from discarded T-shirts.

In multiples, the GRID comes alive, its modular design responding to the emerging behaviours of our public realm. Playfully joining squares and rectangles, colours and tops.

Designed by Industrial Facility

London-based studio Industrial Facility was co-founded in 2002 by designers Sam Hecht and Kim Colin. Their approach reflects both a thoughtful consideration of form and a unique understanding of contemporary life, creating beauty out of utility in the products, furniture and exhibitions they design. Hecht, from London, trained as an industrial designer, while Colin, from Los Angeles, trained as an architect; together they have helped clients to produce projects that display an understanding of cultural relevance and commercial success.

Range

GRID Table 01
W160 x D80 x H74

GRID Table 02
W240 x D80 x H74

GRID Table 03
W80 x D80 x H74

Materials:

Tabletop: Linoleum / Oak veneer / Kvadrat Really Textile Tabletop™
Frame: Steel
Adjustable gliders / Felt

Flatpacked and easily assembled

Interview

Obedient in its function, playful when unleashed.

GRID Table Collection, designed by London-based studio Industrial Facility, is the first product in the Basic Collection from Danish manufacturer +Halle®.

Industrial Facility and +Halle® have spent the last two years perfecting GRID, an affordable range of everyday, anywhere tables. Effective as worktops, dining tables, side tables, or desks, GRID tables are easily assembled, lifted, reconfigured and packaged.

GRID's sturdy steel legs are combined with a choice of tops, showcased with Kvadrat Really Textile Tabletops, an affordable, recycled and circular option made from discarded T-shirts.

In multiples, the collection comes alive, its modular design responding to the emerging behaviours of our public realm. Playfully joining squares and rectangles, colours and tops.

Basic Collection

At +Halle®, it's our job to think about furniture and develop designs that meet the full breadth of our human needs. We have made our name with signature pieces that respond to and influence how we behave in public spaces. The kind of furniture we might gather around or seek out for time out of mind. These designs result from collective investigations into how we live and work today, with a view to where we might be tomorrow.

Our Basic Collection is something different, but also a logical next step for us as we continue to think about the designs people need in every part of their lives. We always said that if we started making furniture for those more routine moments in people's every day, we would do it with a +Halle attitude. This year, we have, and we're happy to announce the launch of the Basic Collection with our first product in the range, the GRID Table Collection.

Basics are well made, built to last, accessible and can be used everywhere. Furniture that moves with our daily rhythms and changing needs. Furniture that's easily lifted, reconfigured and made a mess of. Furniture we surround ourselves with – affordable enough to be bought in multiples, precious enough to be kept. It's furniture that follows us to our next home or place of work, the functional becoming the sentimental. Effectiveness that inspires affection.

Basics inspires affection

“People know +Halle® for the furniture of shared and public spaces, the furniture we might gather around or seek out,” says Martin Halle, CEO at +Halle®. He continues:

“The Basic Collection is the furniture that follows us, becoming part of the pattern of our daily routines. The GRID Table is where you can pick up, move around, work at, sit on, lean against, and reconfigure.”

Built to evolve

“We don't recommend jumping up and down on the GRID Table, but it's tough! It's built to be strong because it should live for years in any environment. This resilience is in the structure, in the simple, honest steel we've used in the construction,” says Sam Hecht, co-founder of Industrial Facility. He continues:

“There are details in the design that will make people want to hang on to this table, maybe it's something that will always be there in your every day. But equally, it's built for change: you might decide you want to switch the top for another. That's the beauty of basics – they're pieces you want to keep, sure, but they naturally evolve with us.”

The +Halle® effect

“Basics is about adding value, function and a certain magic to spaces – very much in keeping with the +Halle® approach as a whole. With the Basic Collection, we've thought carefully about the designs to make things more accessible,” says Kim Colin, co-founder of Industrial Facility. She continues:

"Basics is a lower cost range in the +Halle® landscape. It's what we expect to be there, part of our day-to-day. It's the furniture that surrounds us – affordable enough to be bought in multiples but precious enough to be kept.

“The GRID Table is a perfect example: it's the table you have in your mind when you think ‘table’. It is what it is. Simple but so effective. We've made the table we always wished was there.”

Options

01. Standard combinations / Ready to ship

Sizes:
